

COMMERCIAL OFFER

Mi-8 MTV is an upgraded model of the older Mi-8MT and a worthy continuation of the series of multi-purpose helicopters. This modification can be used to perform a wide range of tasks. At present Mi-8 MTV type helicopters are the most well-known helicopters of its class. They highly proved themselves during operation in more than 50 countries of the world. High reliability, easy controllability, and simple operation of these helicopters made them popular practically on all continents. This helicopter can operate in different climatic zones.

Engines TV3-117VM allow the helicopter in taking off and landing at an altitude of 4000 meters and temperatures from -40 to +40 C. It is important to note that the maximum altitude rose to 6000 meters, not to mention the increased rate of climb, range, etc.

Specification

Name	Part number	Date of manufacture	TSN, hours	TSO, hours
Helicopter	Mi-8MTV-1	2024	0	0
